Director's Pen

It all began in 2002 when I was preparing for different competitive exams. I was deeply moved to see the pathetic condition of the students of Purnea. Who are economically backward but having potential in them. I realized the need of effective education to the children; grieved me too much and I felt that to ignore this problem of our society would be a disservice to the new generation as well as the nation. I suddenly made up my mind to open the school in order to overcome such a problem and bring about a great change in the way of educating the students mostly deprived of the education of global standard. Really it was a pet dream of mine. It was my internal desire to impart effective and purposeful education to the children. Because of this, I set out to translate my dream into concrete reality and considered it as my social responsibility.

Principal's Pen

I Joined this School on 5th Jan 2002 as a teacher. While it had just sprouted up. In the beginning I was bit shaky about the future of the school, but I was delighted, confident and amazed at the enthusiasm of the director of school Mr. Alok Mishra with his efforts and the support of the staff. The school gradually rose up and established its recognition in the town started giving tremendous result which increased the interest of students, teachers and guardians !

When the students began to achieve success in board and different competitive exams, our courage extended to its height. At the same time our director directed us to the right path at the right time. At last but not the least. I pray to god for all the success of school and may all his (Director's) dreams come true.

Our Principal

Premier School is a co-educational English Medium School and run by Premier Educational Trust. It has been established in 2002. It is one of the Institutes of learning with avowed objective of setting new standards in education. The glittering pupil is a testimony to the prestige of the institution.

Our Philosophy

A person is said to be educated when he acquires knowledge, skill, attitude etc. which are the product of the group life at a great cost of time and suffering. Development is the result of learning. The whole process of growth and development which is caused by learning from experience is education.

A child is born with a number of unlearned responses, natural tendencies, impulses, urges and drives. These natural impulses if left unchecked and uncontrolled would lead to barbarian way of life. His life will be unsystematic, purposeless and disorganize. It is education which can give direction for the refinement of the private impulses of the child. It sharpens the intelligence, increase our fame, delights us and spreads our name in all directions.

Our Aim

The aim of the institution is to impart its child a sound intellectual and physical education, So that they may be able to participate effectively in the life of the group to which they belong.

Our Objectives

- ✍ Develop a healthy and balanced personality.
- ✍ Develop vocational efficiency.
- ✍ Develop character and morality of students.
- ✍ Make the children ideal citizen.
- ✍ Enable the child to adjust his environment.
- ✍ Promote social efficiency.

Our Moto

NAHI JANANENA SADRRUSAN PABITRAMIHA VIDYATE

Yoga Education

Yoga means to be in perfect tune. Our body and spirit exist in absolute harmony when we fine tune ourselves to such a point where every think function so beautifully within us. The best of our abilities just flow out of us. yoga activates our inner energies in such a way that our body, mind and emotions function at their highest peak.

Co-Curricular Activities

The aim of education is the development of all the innate facilities of an individual leading to an all round development of his personality. The curriculum that are followed in school at the best can provide some short of intellectual training. But student does not require capacity to apply these in his life. Therefore, we have given place to co-curricular activities in our school curriculum.

Awards

Motivation increases learning. Generally we try to use intrinsic motivation in teaching learning process. We also use extensive motivation and for this purpose we give award to the student.

Laboratory

Our School has laboratory. To understand science practical work is done by the students in guidance of subject teacher.

Our Principles

We avoid negative education.
Correct yourself otherwise everybody will kick you.
We learn to fly but we must learn to move on the earth first.
He who hates children hates God.
Go where none has gone, do which none has done.

We inspire children to raise questions.
We inspire rather than schooling children.
we expect every better and bright thing from the children.
Your Child needs preceptors not teachers.
We provide quality education not quantity.

School Uniform

The school has its own uniform. The School uniform is compulsory on all class days. Students should come with clean and complete uniform. In case of incomplete uniform the students can be sent back.
